A highly informative and innovative new peer-reviewed journal, 3D Printing and Additive Manufacturing provides an international forum for world-class research in additive manufacturing and related technologies. The Journal explores emerging challenges and opportunities including new developments of processes and materials, new simulation and design tools, and informative applications and case studies. The Journal addresses critical issues in policy and law, intellectual property, data standards, safety and liability, environmental impact, social, economic, and humanitarian implications, and emerging business models at the industrial and consumer scales.

MOOCs Forum is the only international peer-reviewed journal dedicated to discussing and resolving the pedagogical, legal, academic, record keeping, and security issues related to Massive Open Online Courses and emerging opportunities for collaborations between academia, industry, and government agencies. Multidisciplinary in scope, MOOCs Forum is the public venue for examining key issues paramount to the success of MOOCs such as increasing course completion rates, course content and examination security, student identification, successful business models, and all evolving topics related to the field. The Journal addresses the rising interest by parents, students, businesses, and institutions for alternative education opportunities.

LGBT Health
Editor-in-Chief: William Byne, MD, PhD
Print ISSN: 2325-8292
Online ISSN: 2325-8306
Quarterly

Dedicated to promoting optimal healthcare for millions of sexual and gender minority persons worldwide, LGBT Health focuses specifically on health while encompassing the full range of relevant biopsychosocial and health policy issues. This authoritative peer-reviewed journal aims to promote greater awareness of health concerns particular to each sexual minority population, improve availability and delivery of culturally competent healthcare services, and encourage further research and increased funding in this critical but underserved domain. Contributions from all continents are solicited, including Asia and Africa which are currently underrepresented in sex research.

Soft Robotics
Editor-in-Chief: Barry A. Trimmer, PhD
Print ISSN: 2169-5172
Online ISSN: 2169-5180
Quarterly

An innovative peer-reviewed journal dedicated to the science and engineering of soft materials in mobile machines, Soft Robotics (SoRo) breaks new ground as the first to answer the urgent need for research on robotic technology that can safely interact with living systems and function in complex natural or human-built environments. Multidisciplinary in scope, the Journal combines advances in biomedical engineering, biomechanics, mathematical modeling, biopolymer chemistry, computer science, and tissue engineering to provide comprehensive coverage of devices applicable in a variety of settings, including surgery, assistive healthcare devices, search and rescue, mine detection, and more.

Journal Expansion

Thyroid Expands to Include Groundbreaking Videojournal, Abstracts and Critical Commentary

Mary Ann Liebert, Inc. and the American Thyroid Association (ATA) are pleased to announce the groundbreaking expansion of the flagship journal Thyroid. In Spring 2014, Thyroid will launch an innovative, quarterly, rapid-publication videojournal companion called VideoEndocrinology, dedicated to publishing high-quality videos of cutting-edge surgical and diagnostic imaging techniques and technologies. Beginning in January 2014, the highly valued monthly abstract and commentary publication Clinical Thyroidology, led by Editor-in-Chief Jerome M. Hershman, MD, will be part of the Thyroid journal expansion and enhanced by a sophisticated online format that will be easily searchable and discoverable.

VideoEndocrinology and Clinical Thyroidology are included in your 2014 subscription to Thyroid.

Print ISSN: 1050-7256  28 Issues Per Year
Online ISSN: 1557-9077  www.liebertpub.com/thy

8 Journal Frequency Increases

- Advances in Wound Care – From 10 to 12 issues
- Biosecurity and Bioterrorism – From 4 to 6 issues
- Brain Connectivity – From 6 to 10 issues
- Breastfeeding Medicine – From 6 to 10 issues
- Metabolic Syndrome and Related Disorders – From 6 to 10 issues
- Thyroid – From 12 to 28 issues/videos with VideoEndocrinology and Clinical Thyroidology
- Viral Immunology – From 6 to 10 issues
- Zebrafish – From 4 to 6 issues
